This bank with its ample capital and surplus, its adequate equipment and facilities, solicits the accounts of manufacturers, wholesalers, retailers and individuals on the best terms consistent with sound banking.

No account too large to be handled satisfactorily; none too small to be appreciated.

When Buying Fuel

The consumer must always figure on the actual amount of heat and comfort that is gotten for the money spent.

We believe that our connections of long standing, coupled with the large amount of fuel that we buy, make it possible for us to sell the very highest grades of Coal and Wood at prices that are cheapest to the consumer. A trial order of our Coal and Wood, or an opinion from some of our satisfied customers, will prove that our idea of putting quality first is correct.

Alexandria Gazette.

THURSDAY EVENING, NOV. 3

His Discipline.

"Pop, you must take this child in hand. I have had about all that I can stand. She has no notion of minding me; it is time you took her across your knee."

"Send her to me," said Pop, with a frown. "It won't take me long to tone her down."

But how could he punish her, tell me, do, when she looked at him with her eyes of blue? Looked at him in the same glad way that her mother did in that far-off day when she was his sweetheart and he her beau. How could he strike her I'd like to know?

But still he took her upon his knee and at once was lost in a reverie that carried him back to a shady street and a little maid whom he used to meet, a blue eyed maid whose counterpart now sat on his knee with a beating heart, waiting for him to forget those days and punish her for her wilful ways.

Mom peeped in through the half closed door. They were playing jacks on the parlor floor, playing jacks and quarrelling, too, just as two children are apt to do. She frowned, it was more than half a century, "I will have to punish them both, I guess."—Chicago Record-Herald.

Origin of Confetti.

The history of confetti is rather curious. Several years ago a large printing works in Paris was turning out immense quantities of calendars, through which a small round hole had been punched to receive an eyelet for holding the sheets together. A heap of the little circular scraps of paper cut out by the punch accumulated on a table, and one of the machine men amused himself by scattering a handful of them over a working girl's hair. She immediately snatched up a handful and threw them in his face. Other girls followed her example, and the first confetti battle began. The head of the establishment came in when it was at its height, and, being what the Americans call a "smart man," he at once realized that there was "money in it." He ordered special machinery, placed large quantities of the new article on the market, made a fortune and created a new industry.

The Ways of Moles.

Among common animals few have been less studied in their life history than the mole. An English naturalist, Mr. Lionel E. Adams, says that under the "fortress" which the mole constructs above the surface of the ground will always be found a series of tunnels running out beneath the adjacent field. A curious feature almost invariably found is a perpendicular run penetrating about a foot below the bottom of the nest and then turning upward to meet another run. A mole is never found in his nest, although it may be yet warm from his body when opened. Guided by smell and hearing, a mole frequently locates the nest of a partridge or pheasant above his run and, penetrating it from below, eats the eggs. The adult mole is practically blind, but there are embryonic indications that the power of sight in the race has deteriorated.

An Arab Legend.

"There is none so poor but there is one poorer."

A poor Arab spent his last bari on a handful of dates and went up on a high cliff to eat them and die. As he threw the stones over a lean hand shot out below and caught them. "Ho! stones!" "Why do you catch my date stones?"

"Because, O brother," answered a weak voice, "I have not eaten these three days, and Allah has sent these stones to save my life."

"Praise be to Allah," answered the first man, "for he has saved me also, for here is one poorer than I."

And both men went into the city.

First Test of the Air Pump.

The first public test of the air pump was in 1654 by its inventor, Otto von Guericke. In the presence of Emperor Ferdinand of Germany, Guericke applied the carefully ground edges of metallic hemispheres, two feet in diameter, to each other. After exhausting the air by his apparatus he attached fifteen horses to each hemisphere. In vain did they attempt to separate them because of the enormous pressure of the atmosphere. The experiment was a great success.

No Right to Live.

Beggar—Won't you give me some money, professor? My money is all gone, and I can't live.

Professor—How old are you?

Beggar—Forty years, sir.

Professor—Forty years! Don't you know that according to the latest mortality tables the average age of the male population of Europe reaches only thirty-four years and five months? Statistically you have no right to live any longer anyway!—Megendorfer Blatter.

Two Faults.

"You hunt too much," said Louis XV. to the archbishop of Narbonne. "How can you prohibit your curates from hunting if you pass your life in setting them such an example?"

"Sire," said Dillou, "for my curates the chase is a fault; for myself it is the fault of my ancestors."

Politeness.

Politeness is a sort of guard which covers the rough edges of our character and prevents them from wounding others. We should never throw it off even in our conflicts with coarse people.

Capacity Diminishing.

Mrs. Guzzler—Aren't you ashamed to come home in this condition? Mr. Guzzler—Mortified to death, my dear. I find my capacity isn't what it used to be.—Philadelphia Record.

Mirth is too often but melancholy in disguise.—Leigh Hunt.

Lame back comes on suddenly and is extremely painful. It is caused by rheumatism of the muscles. Quick relief is afforded by applying Chamberlain's Rubefacient. Sold by W. F. Frighton and Richard Gibson.

In Sudden Emergencies

like illness, it is often necessary quickly to raise the temperature of a room. For instance, in those hours between midnight and dawn, when the day temperature has been allowed to drop, if you are called upon to get up, the room is chilly and cold. It takes a long time to start up a furnace or fire and raise the temperature by ordinary means.

You can instantly heat a room to any desired temperature with a

PERFECTION
SMOKELESS
OIL HEATER

Absolutely smokeless and odorless

It quickly gives heat, and with one filling of the font burns steadily for nine hours, without smoke or smell. Has automatic-locking flame spreader which prevents the wick from being turned high enough to smoke, and is easy to remove and drop back, so the wick can be cleaned in an instant. It has a cool handle and a damper top.

An indicator always shows the amount of oil in the font. It has a filler-cap which does not need to be screwed down; it is put in like a cork in a bottle, and is attached to the font by a chain.

The burner body or gallery cannot become wedged, because of a new device in construction, and consequently it can always be easily unscrewed in an instant for reworking.

The Perfection Oil Heater is finished in Japan or nickel. It is strong, durable and well made, built for service, yet light and ornamental.

Dealers Everywhere. If not at hand, write for descriptive circular to nearest agency of the

Standard Oil Company
(Incorporated)

In Bad Fix

"I had a mishap at the age of 41, which left me in bad fix," writes Mrs. Georgia Usher, of Conyers, Ga.

"I was unconscious for three days, and after that I would have fainting spells, dizziness, nervousness, sick headache, heart palpitation and many strange feelings."

"I suffered greatly with ailments due to the change of life and had 3 doctors, but they did no good, so I concluded to try Cardui."

"Since taking Cardui, I am so much better and can do all my housework."

Take CARDUI
The Woman's Tonic

Do not allow yourself to get into a bad fix. You might get in so bad you would find it hard to get out.

Better take Cardui while there is time, while you are still in moderately good health, just to conserve your strength and keep you in tip top condition.

In this way your troubles, whatever they are, will gradually grow smaller instead of larger—you will be on the up-grade instead of the down—and by and bye you will arrive at the north pole of perfect health.

Get a bottle at your druggists' today.

FOR SALE

Two of the choicest and best built dwellings in the city of Alexandria, located on North Columbus Street, between Queen and Princess Streets (Court House square), each house contains eight rooms and every modern convenience, including hot water heat, electric lights and concreted cellars.
